10 years EnviroChemie on site in Bulgaria

Since 2007, EnviroChemie has been operating a sales and service office in Sofia, Bulgaria. The water experts on site consult on and plan customised systems for industrial water and wastewater technology, for example in the food and beverage industry, the chemical industry or for the mining industry.

EnviroChemie also supports its customers on site with a comprehensive range of services during operation of the treatment plants. This includes the delivery of proven water chemicals for the operation of the systems as well as servicing by local technicians, who ensure faultless operation of the systems.

For many years, EnviroChemie has been presenting the latest technologies for water treatment and wastewater treatment that conserve resources and are energy efficient at the trade fair "Water Sofia". This year, "10 years of EnviroChemie Bulgaria" was celebrated with a party at our stand together with partners and customers, to which numerous guests were welcomed. "We will continue to provide quality products "Made in Germany" as usual, and a comprehensive customer service. We look to the future with confidence and motivation", ensured Dr. Maria Natcheva, country manager for EnviroChemie Bulgaria.
