

The digital service platform
Water management in your pocket

The benefits at a glance

The digital service platform WaterExpert™ provides support for day-to-day plant operations. It enables users to record and analyse data, guides them through workflows or provides information during troubleshooting tasks.

Transparency

- Key performance indicators are visualised
- All activity is presented, even historical activity
- Access documentation quickly and easily

Operational reliability

- Data is continuously analysed
- Plant can be directly accessed
- Reliable conformance to limit values
- Fewer accidents at work due to stored work instructions and trainings

Speed

- Smart glasses for hands-free, video-based support
- Quick response to malfunctions
- Traceable maintenance and lab data

Sustainability

- Optimise operating costs (chemicals, energy, spare parts)
- Lower carbon footprint
- Less travel required

WaterExpert™ *because it's never been so easy to keep your plant under control*

InformationHUB

data from a single source

InformationHUB is used to manage all your documents and data, and allows you to access them directly via the app, your mobile phone, your tablet or your computer's browser. InformationHUB is a useful aid in your day-to-day tasks and reporting duties. The most important key performance indicators are calculated and then visualised to provide a simple overview.

ExpertHUB

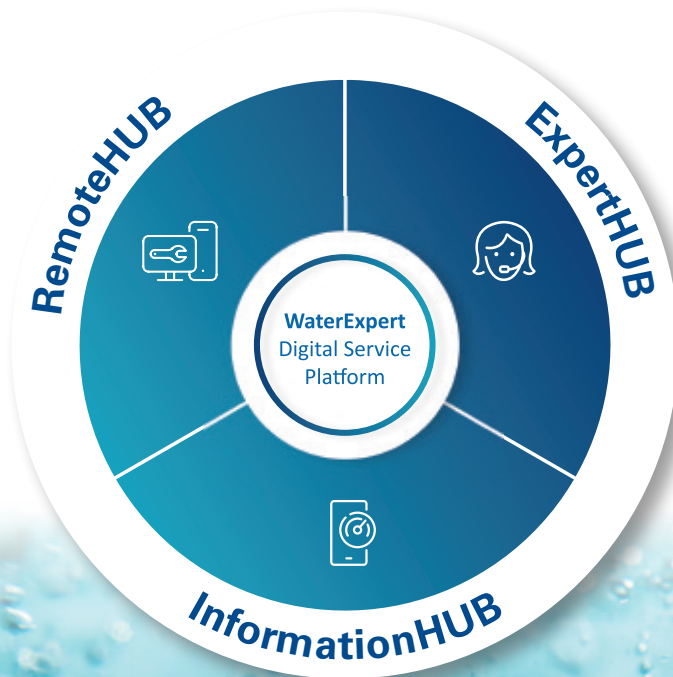

your direct line to expert knowledge

We share our wealth of expertise with you. ExpertHUB analyses your data and provides recommendations for action. As a WaterExpert™ user, you benefit from our comprehensive expertise in plant engineering and plant operation, receive information on upcoming maintenance work and discover how you can operate your plants more efficiently.

RemoteHUB

remote proximity

The distance between you and our experts is inconsequential. Via our RemoteHUB, we can assist you quickly via smart glasses or through remote maintenance support. Customers value RemoteHUB's capabilities during commissioning tasks, in the event of faults or for assisting untrained personnel, for example.

Processes simply made better

Take your wastewater system to a new level and use our digital service platform WaterExpert™ throughout every stage of a plant's life cycle. Thanks to its database of recommendations for action or via the ExpertHUB, WaterExpert™ enables you to solve issues easily. You can minimise risks and operate your plants in a predictive manner.

Want to find out more about WaterExpert™?

Get in touch with us today and see it for yourself. We would be happy to demonstrate our show plants and talk to you about user experiences.
