

Press release

Schweitzer-Chemie to join EnviroWater Group

Rossdorf/Freiberg am Neckar. 27.03.23

**EnviroWater Group is pleased to welcome its newest member –
Schweitzer-Chemie GmbH will join a powerful community**

On 01 April 2023, SKion Water GmbH will take on 100% of the company shares of Schweitzer-Chemie GmbH. Schweitzer-Chemie will continue to operate as an independent company as part of the EnviroWater Group, which belongs to SKion Water GmbH.

In welcoming this specialist for water treatment into the fold, the Group gains one of the most successful medium-sized enterprises in the water industry on the German market – significantly enhancing its commitment to professional water management in industrial and building facility applications. Using a three-pronged approach of chemistry, technology and technical services, Schweitzer-Chemie offers premium solutions for the entire range of applications for cooling water, boiler water, humidification systems, drinking water, process water and hygiene monitoring systems.

The Freiberg-based company has a total turnover in excess of EUR 33 million, and its 225 employees support and advise more than 10,000 customers. Even after 22 years, its dynamic growth continues unabated. The company offers an impressive portfolio of products and services, gaining an average of 2.5 new customers every day.

Dr Jörg Krause, CEO of EnviroWater Group, is thrilled about the new partnership. “The passion and team spirit underpinning the excellent services that the experts at Schweitzer-Chemie provide for water treatment fit in perfectly with our culture. I know that

many customers of Schweitzer-Chemie and EnviroWater Group will benefit from the shared expertise and the even greater solutions this presents for sustainable water management”.

“By joining a powerful group of companies, we can significantly expand our range of services to advance our success together. We know that we have found the best environment for our company’s future – the development opportunities and possibilities for the future are excellent,” explained Bernd Schweitzer, who will continue to manage the company together with his colleague, Wolfgang Eggerl.

Dr. Reinhard Hübner, CEO of SKion Water: “Schweitzer-Chemie is yet another leading medium-sized enterprise from the water industry that has decided to join SKion Water. Both customers and employees of Schweitzer-Chemie will benefit from being part of a powerful group that will continue to drive the success story of Schweitzer-Chemie forward. We are delighted with this new reinforcement in the EnviroWater Group and the trust that the Schweitzer-Chemie team has placed in us.”

About SKion Water

*Together with its subsidiaries, **Skion Water** is a technology and solutions provider and plant engineering company for municipal and industrial water and wastewater technologies. SKion Water invests in innovative water technology companies who possess suitable technologies for its portfolio. SKion Water is a subsidiary of SKion GmbH, the investment company of German entrepreneur Susanne Klatten. www.skionwater.com*

About the EnviroWater Group

Owned by the parent company EnviroChemie, the EnviroWater Group is a family of European companies specialising in a multitude of different water treatment technologies and sectors. With its service portfolio, the Group supports its customers throughout the entire life cycle of their plants. The EnviroWater Group is divided into three clusters of experts:

- *EnviroChemie: Wastewater and cooling water treatment, water recycling*
- *EnviroFALK: Water, process water and ultrapure water treatment*
- *EnviroProcess: Water technology for the pool & spa segment*

The EnviroWater Group is part of SKion Water.
