EnviroChemie has acquired UK-based Osiris Water Management

EnviroChemie GmbH has acquired UK-based Osiris Water Management, an excellent addition to EnviroWater Group's water treatment service offering in the UK.

Osiris Water Management provides water system maintenance services to help businesses maintain system efficiency and ensure compliance with the latest legislation. Osiris perfectly complements EnviroChemie's business in the UK.

Established in 2007, Osiris Water Management has been providing water treatment services for over 15 years, including expert legionella control. Chris Müller and Ron Harradine, former owners of the company, have developed a team of dedicated staff into a recognized water treatment company in the UK. They offer bespoke service systems that customers trust.

"As part of the EnviroWater Group, a European network of water specialists, we want to consolidate our position in the UK market and further optimize our service offering. We believe this is a great opportunity for all of us at Osiris and we look forward to an exciting future with the Enviro Water Group," said Ron Harradine, founder of Osiris Water Management.

With the sale of Osiris to EnviroChemie, Ron Harradine is leaving the management team. Chris Müller will be supported in the management by Conor O'Donovan, Managing Director of EnviroChemie UK.
